

Accelerated Hydrogen Peroxide (AHP) Indicator Test Strips

Accelerated Hydrogen Peroxide (AHP) indicator test strips are used for confirming that the disinfection solution has been correctly diluted prior to its use to ensure the solution is doing its job as a sanitizer, disinfectant or sterilant.

AHP500

Can be used on all 7% Accelerated Hydrogen Peroxide Disinfectants (Accel Surface Cleaner and Disinfectant Concentrate, Virox 5, PerCept, Turbulence, Hydrotherapy) 3% Stabilized Hydrogen Peroxide products (PerDiem, Hydrox Disinfectant Cleaner)

AHP100

Can be used for 7% Accelerated Hydrogen Peroxide No Rinse Sanitizer (Viper Broad-Spectrum No Rinse Sanitizer, Virox Broad-Spectrum No Rinse Sanitizer) and 3% Stabilized Hydrogen Peroxide Disinfectants (PerDiem, Hydrox Disinfectant Cleaner)

AHP2

Can be used for 2% Accelerated Hydrogen Peroxide High Level Disinfectant and Chemosterilant (Accel Prevention, Resert)

AHP7

Can be used for 7% Accelerated Hydrogen Peroxide High Level Disinfectant and Chemosterilant (Accel CS 20, Optim CS)

AHP Indicator Strips are an easy to use monitoring system for users of disinfectants, sanitizers, high level disinfectants and Chemosterilants. Quickly determines if the correct concentration of hydrogen peroxide is present with a Pass / Fail reading. For Additional information, please visit our website www.virox.com.
