BUTCHERS®

Introducing the next generation in disinfection.

Carpe Diem™ Tb Cleaner Disinfectant with AHP® Technology

Seize the day with CARPE DIEM™ Tb, a revolutionary, hospital-grade cleaner disinfectant formulated with patented AHP® hydrogen peroxide technology that effectively delivers broad-spectrum disinfection to hard, non-porous, inanimate surfaces in just 60 seconds.

Hospital-acquired infections (HAIs) kill one person every six minutes.† Cleaning and disinfecting hard surfaces is critical to reducing the staggering amount of HAI cases. However, most disinfectants take 5 to 10 minutes to work, a time frame that simply doesn't keep up with the fast pace in medical facilities today.

Now, with CARPE DIEM™ Tb Cleaner Disinfectant, you can disinfect hard, non-porous, inanimate surfaces in only 60 seconds. And it is effective against the drug-resistant strains MRSA and VRE.

Seize the day with CARPE DIEM™ Tb.

*AHP® and design trademark and patented AHP® hydrogen peroxide technology are properties licensed from Virox Technologies.

Disinfect

CARPE DIEM™ Tb Cleaner Disinfectant is based on breakthrough AHP® technology, a synergistic blend of cleaners and low levels of hydrogen peroxide. It dramatically increases cleaning performance and delivers 60-second disinfection on hard, non-porous, inanimate surfaces. For example, a standard 3.0% hydrogen peroxide solution requires 75 minutes to kill Poliovirus Type I. The active ingredient in CARPE DIEM™ Tb Cleaner Disinfectant — 0.5% hydrogen peroxide — requires just one minute. It is ideal for decontaminating bodily fluids, controlling pathogen outbreaks and cleaning high-risk infection areas.

Protect

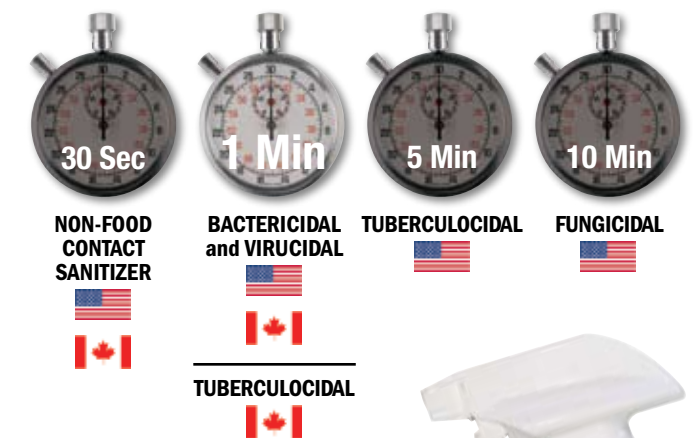

The 60-second contact time and broad-spectrum activity of CARPE DIEM™ Tb Cleaner Disinfectant mean that healthcare professionals can be confident that their disinfectant is doing its job. In addition to its efficiency, it has an excellent safety and environmental profile. It is essentially non-irritating to eyes and skin, free of Volatile Organic Compounds (VOCs) and its active ingredient breaks down to water and oxygen. It also has HMIS ratings of 0 for health, flammability and reactivity.

At-a-Glance

Benefits of CARPE DIEM™ Tb Cleaner Disinfectant:

- Realistic one-minute contact time increases the likelihood of proper usage
- Regular use helps reduce costs associated with HAIs, including extended hospital stays and treatment
- Designed for use with microfiber cleaning tools with no loss of active ingredient
- Non-corrosive formula is safe on most healthcare hard surfaces

	Carpe Diem Tb	Bleach
ODOR	Pleasant	Chlorine
C. DIFF - SPORICIDAL CLAIM	No	No
TUBERCULOCIDAL	Yes	No
HMIS/NFPA - REACTIVITY RATING	0	1
HAZARDOUS DECOMPOSITION PRODUCTS	None	Chlorine
